

# AO Trauma Course—Minimally Invasive Osteosynthesis with Anatomical Specimens

## Singapore

July 11 to 13, 2019

**Yong Ren**  
Khoo Teck Puat Hospital  
Singapore  
Chairperson

**Andy Yeo**  
Changi General Hospital  
Singapore  
Co-Chairperson

**Reto Babst**  
Kantonsspital Luzern  
Switzerland  
Faculty

**Rodrigo Pesantez**  
Fundacion Santa Fe de Bogota  
Colombia  
Faculty

**Theerachai Apivatthakakul**  
Chiang Mai University  
Thailand  
Faculty

**Chang-Wug Oh**  
Kyungpook National  
University Hospital  
Korea  
Faculty

### Course Introduction

Minimally invasive osteosynthesis (MIO) refers to surgical techniques designed around the principle of minimizing the insult of surgery to a patient, thereby facilitating healing and recovery. A combination of small incisions and minimal soft tissue stripping preserves perfusion to soft tissue and bone. This is achieved by decreasing the size of soft tissue windows, and minimizing dissection. Reduction is undertaken by indirect methods and fixation is carried out without direct visualization of bone.

### Course Venue

**Changi General Hospital**  
2 Simei Street 3  
Singapore 529889

**Course Fees USD 2,000**

**30%** Course fee discount  
for 1<sup>st</sup> **10** Singapore AO Member

Payment method  
Online payment via Credit card

Discount will be given on a first come, first served basis

### Course Overview

In the course of our 3 day program, you will learn,

1. The biological basis driving the shift to minimally invasive techniques.
2. Anatomy and safe zones for placement of minimally invasive incisions.
3. Direct and indirect reduction techniques.
4. Application of MIO techniques for both the upper and lower limbs.
5. Application of MIO techniques for other scenarios in the body.
6. Complications and difficulties with MIO.

### Target Participants

**Senior Resident to Junior Associate Consultant**
